

ALVA'S HOMOEOPATHIC MEDICAL COLLEGE, MIJAR

REPORT ON VISIT TO PRIMARY HEALTH CENTRE

AND ANGANWADI

On 14/06/2025, Saturday a Primary Health Centre & Anganwadi visit was organised by the Department of Community Medicine of AHMC TO Prathamika Arogya Kendra which is situated in Kallamundkur of 4,065 population. The visit was carried out under the guidance of Dr. Bibi Asma Desai HoD and Dr. Sharath Mandicha, Associate Professor of Community Medicine Department. We reached there by around 10:30am and further we were divided into group of 5 and were instructed to collect the data from different departments. We were allotted to the Pharmacy Department and asked to enquire the details regarding the same. The Pharmacy is situated in the entrance of the PHC. Further enquired about the storage of medicines which was stored in a room with refrigeration of the medicines. A proper stock register with expiry date of the medicines is maintained.

The indent register regarding the list of medicines which they purchased and the details regarding the medicines which is sent by the manufacturers is also properly maintained along with the bills of purchases. The medicines were employed to the patients free of cost with proper prescription and the instructions to take the medicines is thoroughly explained as well as written to the patients by the pharmacists. The pharmacy constituted mainly 2 pharmacists during our time of visit. Finally, we enquired regarding the National Pharmacist Day which is celebrated on January 12. We also clarified the doubts regarding some information from the MO who was present there who gave us some more information regarding the staff pattern also. Further we all completed the other data which was given like No. of beds, laboratories, record room etc from other groups. A staff present there showed us the cold chain equipment where the vaccines were stored and taken care. The collected information was written in the sheet simultaneously.

Overall, the Prathamika Arogya Kendra is functioning with sufficient staff, proper infrastructure, sanitation and hygiene along with health programmes and treatment facilities which ultimately aim to build up a healthy society. Finally we ended the visit by taking group photograph and returned from there by 12:30pm.
